

REQUEST FOR PROPOSAL (RFP)

Enterprise Security & Cloud Infrastructure Platform

TO:	Global Financial Services Corporation Inc.
ISSUED BY:	Technology Solutions RFP Committee
ISSUE DATE:	2026-06-13
PROPOSAL SUBMISSION DEADLINE:	2026-06-21 (7 days - URGENT)
CONTRACT AWARD DATE:	2026-07-13
CONTRACT VALUE:	\$850,000 USD
CONTRACT DURATION:	24 months with 2-year support
RFP REFERENCE:	RFC-2026-FINANCIAL-PLATFORM-001

1. EXECUTIVE SUMMARY

The Financial Services Corporation seeks an enterprise-grade security and cloud infrastructure platform to support critical business operations across global markets. This RFP requires comprehensive security compliance, high availability, and disaster recovery capabilities with aggressive SLA requirements.

2. TECHNICAL REQUIREMENTS

- TR-001: Multi-cloud architecture (AWS, Azure, GCP) with automatic failover
- TR-002: Kubernetes orchestration with 99.99% uptime SLA
- TR-003: Advanced load balancing with geographic redundancy across 5+ regions
- TR-004: Custom REST/GraphQL APIs with rate limiting and OAuth 2.0
- TR-005: Real-time data synchronization across distributed systems (<100ms latency)
- TR-006: Advanced monitoring, logging, and tracing (OpenTelemetry integration)
- TR-007: Microservices architecture with service mesh (Istio/Linkerd)

3. SECURITY REQUIREMENTS (CRITICAL)

- SR-001: End-to-end encryption (AES-256) with hardware security modules (HSM)
- SR-002: Zero-trust security architecture with MFA and biometric authentication
- SR-003: Regular penetration testing and vulnerability assessments (quarterly)

- SR-004: FIPS 140-2 Level 3 compliance with DISA-accredited certification
- SR-005: Network isolation with air-gapped systems and intrusion detection

4. REGULATORY & COMPLIANCE REQUIREMENTS (MANDATORY)

- CR-001: SOC 2 Type II certification (annual audit required)
- CR-002: HIPAA compliance for healthcare data handling
- CR-003: PCI DSS 3.2.1 certification for payment processing
- CR-004: GDPR/CCPA compliance with automated data retention policies

5. FUNCTIONAL REQUIREMENTS

- FR-001: User management with role-based access control (RBAC)
- FR-002: Audit logging of all user actions (immutable audit trails)
- FR-003: Automated backup and restore with <4 hour RTO
- FR-004: Self-service dashboard for resource monitoring
- FR-005: API rate limiting and quota management

6. SERVICE LEVEL AGREEMENTS (STRICT PENALTIES)

Metric	Target	Penalty
Uptime	99.99% monthly	\$5,000/hour downtime
Response Time (API)	<200ms p99	\$1,000/incident
MTTR	<30 minutes	\$2,000/incident
Backup RPO	<15 minutes	\$3,000/incident
Disaster Recovery RTO	<4 hours	\$10,000/incident

7. DISASTER RECOVERY & BUSINESS CONTINUITY

• DR-001: Real-time replication to geographically diverse data centers • DR-002: Automated failover with zero data loss capability • DR-003: Annual disaster recovery testing and validation • DR-004: Detailed runbooks and 24/7 on-call support team

8. IMPLEMENTATION TIMELINE (AGGRESSIVE)

Phase	Duration	Deadline
Phase 1: Design & Architecture	2 weeks	2026-06-27
Phase 2: Development & Testing	6 weeks	2026-08-08
Phase 3: Security Certification	4 weeks	2026-09-05
Phase 4: Production Deployment	2 weeks	2026-09-19

9. SUBMISSION INSTRUCTIONS

Proposals must be submitted by 2026-06-27 17:00 UTC. Late submissions will be rejected automatically. Submit proposals as a single PDF document including technical specifications, compliance certifications, implementation plan, team CVs, and three customer references.

10. EVALUATION CRITERIA

• Technical capability and architecture design (35%) • Security and compliance certifications (25%) • Implementation timeline feasibility (20%) • Cost-effectiveness (20%) Proposals lacking mandatory security certifications will be rejected without further evaluation.
